EXAMINER'S AMENDMENT

An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to the Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

ABSTRACT

In the abstract at the second to last line, delete the phrase "means of".

CLAIMS

Claim 32, line 1; change the phrase "in claim 14" to --in claim 31--.

EXAMINER'S COMMENT

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they (Fig. 1) include the reference character "18" which is not mentioned in the description.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the Examiner, the Applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance:

Claim 17 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method for "adjusting a waste gas probe measuring signal" comprising:

pre-defining a crankshaft angle relative to a reference position of a piston in a cylinder of the engine, wherein the predefined crankshaft angle is adapted as a function of an instability criterion of the controller;

detecting the measuring signal; and

generating a variable by a controller for influencing the air/fuel ratio in the respective cylinder based on the detected measuring signal,

in combination with the remaining limitations of the claim.

Claims 18-33 have been found to be allowable over the prior art due to the claims' dependency on claim 17.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
